Transformational Stories

Smile correction using **Zirconia Crowns**

Before

After

Patient reported to the dental OPD with a chief complaint of stained and mal-aligned anterior teeth. Initial plan was to restore only the small lateral incisors using veneers, but after evaluation of Images and radiographs the decision in consent with the patient was taken to restore his complete smile line using four zirconia Crowns. The result was a beautifully aligned smile and all fluorotic stains were masked.

Before

After

Laser Frenectomy

The patient complained of a gap in the front teeth and was suggested for treatment with braces and removal of deep lip attachment.

The patient underwent orthodontic treatment for mid-line diastema closure. The labial attachment (frenum) was cut, and fibrous tissue was excised using lasers making the procedure comfortable, blood-less and pain-less.

Zirconia Crowns

Before

After

A 21-Year-Old female patient complained of a broken front tooth.

An all-ceramic restoration was advised to the patient to cover the broken tooth and restore her smile and the treatment brought back her confidence.

Full mouth rehabilitation using Implants

Before

After

Patient reported to the clinic with a complaint of grossly broken teeth and inability to chew properly. On evaluation it was found that the patient had twenty root stumps with no actual teeth. All root stumps were removed and 6 implants each in the upper and lower jaw were placed and a implant supported fixed dentition was given to the patient. As a result from 'No teeth to having teeth in one week.

Bleaching

Before

After

The 22-year-old male patient complained of brownish discoloration of teeth and was suffering from low esteem.

The patient was treated with in-office bleaching with a special bleaching light.

The patient is now happy with restoration of a good smile.

With 3D printing and digital scanning **Ceramic Veneers**

Before

After

Patient reported to the clinic with complaint of discolored and multiple carious teeth spoiling his smile. He was advised porcelain/Ceramic veneers, tooth preparation was done followed by digital intraoral scan, and models were prepared through 3D printing. The veneers were delivered to the patient, and he is very satisfied with the result.

Apicoectomy Surgery

Before

After

Patient reported to the clinic with the history of traumatic fall and discoloration of lower incisor. On X-ray and CBCT evaluation it was found a lesion extending from central incisor to canine.

Apicoectomy was planned for the patient and surgery was performed, enucleation was done, and bone grafting was done to fill the defect.

Patient is recovering well from the procedure.

Zirconia Crowns

Before

After

A 49-year-old male patient complained of discoloration in relation to the lower front tooth.

On examination 31 was nonvital and the patient was advised RCT and Zirconia Crown.

The Root Canal Treatment was successfully completed and Zirconia Bruxzir anterior crown was cemented.

ASHISH BAHAL

HCL Tech, SEZ Noida - 126

I had a pain-free experience with my root canal treatment and crowning procedure. The dentist at HCL Healthcare and the entire team were skilled and knowledgeable. They encouraged me at every step. There's no second thought about recommending HCL Healthcare to my family and colleagues.

MEKA

HCL Tech, Chennai

I registered myself for a cashless health check-up and was amazed to see HCL Healthcare's Oral Healthcare. After a sound dental screening procedure, the dentist diligently diagnosed minor and major dental issues including cavity, gum, alignment, and ulcer. For me, it was fixing alignment issues. The procedure was easy and painless. Overall, it was an amazing experience. I am thankful to the dentist and the entire clinical team of HCL Healthcare.
